SUMMARY

Computer Science and Business Systems undergraduate with experience in full-stack web development, backend development, and AI-powered applications. Skilled in Python, Java, React.js, Node.js, PostgreSQL, REST APIs, Data Structures & Algorithms, and software design, with an interest in building scalable and reliable software systems.

EDUCATION

Jansons Institute of Technology
Bachelor of Technology in Computer Science and Business Systems, Relevant Coursework: Data Structures & Algorithms, Object-Oriented Programming, Database Management Systems, Software Engineering

Sep 2023 – Jun 2027

EXPERIENCE

Web Developer Intern
ELGI Equipments Limited

Aug 2024 – Nov 2024

- Worked in Agile teams using Scrum methodology, sprint planning, and user story implementation.
- Contributed to digital twinning-related web applications and software solutions.
- Collaborated with cross-functional teams to deliver iterative software improvements.

Software Developer Trainee
HE5 Solutions

Jul 2025 – Oct 2025

- Developed authentication workflows and backend modules using Python.
- Assisted in Single Sign-On (SSO) integration and token-based authentication systems.
- Identified and resolved authentication vulnerabilities to improve application security.

PROJECTS

Multi-Tenant Task Management System | React.js, Node.js, PostgreSQL, Docker

- Developed a multi-tenant task management system with secure tenant isolation, JWT authentication, and Role-Based Access Control (RBAC).
- Designed REST APIs and PostgreSQL database schemas for managing users, organizations, projects, and tasks.
- Containerized the application and database using Docker and Docker Compose for consistent development and deployment.

AI-Powered Document Q&A System | Python, LLM, RAG

- Built a PDF-based question-answering system using Python and an LLM to answer questions from document content.
- Implemented document text extraction and chunking to efficiently process large PDF documents.
- Developed a retrieval-based pipeline that identifies relevant document chunks and provides them as context to the LLM for generating answers.

TECHNICAL SKILLS

Programming Languages: Python, Java

Web Technologies: HTML5, CSS3, React.js, Node.js, REST APIs

Databases & Cloud: MySQL, PostgreSQL, Docker

AI: LLMs, RAG

Core Computer Science: Data Structures & Algorithms, Object-Oriented Programming (OOP), Database Management Systems (DBMS)

LEADERSHIP & ACTIVITIES

Project Director | IEEE Student Branch - Led student project initiatives and coordinated technical activities and project execution.

Member | Institution’s Innovation Council (IIC) - Participated in innovation and entrepreneurship initiatives and technical programs.
